INTRODUCING!

DAKOTA CANOPY

UTILITY BODY

This enclosed utility body was designed to make your job easier. The storage compartments provide optimal organizational space and easy access to tools and equipment. This mobile workshop will not only keep your equipment and tools safe, but will also keep them protected from damaging weather. The lightweight, aluminum construction option will provide you with dependable durability as well as more payload capacity when compared to steel utility bodies. One of the best features of the Dakota Canopy Body is that it can be fully customized to serve the needs of multiple job trades including: utilities, HVAC/plumbing, telecommunications, electrical as well as other applications.

> ALUMINUM CONSTRUCTION OPTION

- Reduced fuel consumption
- Increased payload capacity

> POWDER COAT PROTECTION

- Superior rust and corrosion resistance.

> UNI-STRUT ADJUSTABLE SHELVING

- Gives operators the ability to add and adjust uni-strut mounted accessories.

> LED INTERIOR LIGHTING

> WILL SOON BE AVAILABLE ON NUMEROUS CAB CHASSIS AND VAN MAKES AND MODELS

- Coming soon in galvaneal and stainless steel
